Re: ODOT
File No.: HOTD-10935

Dear ODOT:

The Department of Environmental Quality has received report and First Strike Environmental certification concerning the heating oil underground storage tank (UST) decommissioning conducted at Hwy 138 Milepost 38.9, in Idleyld Park, Oregon.

First Strike Environmental was licensed to provide heating oil tank services and has certified that the decommissioning has met the Department's requirements. The Department has registered this report and certification.

The decision to register the report and certification will no longer apply if new or undisclosed facts show that the project does not comply with the rules governing heating oil tank decommissioning.

We recommend that a copy of all of information associated with the decommissioning be kept with the permanent property records.

Your efforts to comply with Oregon's environmental rules and regulations to ensure that your heating oil tank has been adequately addressed have been appreciated. Proper decommissioning helps ensure protection of the environment from future heating oil tank leaks. If you have any questions, please feel free to contact me at (503) 229-5474.

Sincerely,

Andree Pollock, Manager
UST Cleanup and Compliance Section
